For many years we have known the secret of our salt air frost.

Balsam fir require 21 hard frost mornings to set their needles.

Only then are the fir boughs seasoned to ensure the lasting

fragrance, greenery and needle retention required for our Christmas Wreaths.

Each handcraft product is packed in a humidity controlled box
suitable for yourself or a gift presentation.

100%
of this fundraising effort
is to support travel and team costs
for our Rep Hockey Teams

Make cheques payable to
Prince Rupert Minor Hockey

Order deadline Monday November 7th /15
Wreaths will be available the week of December 7th /15

FREQUENTLY ASKED QUESTIONS

How long will my wreath last ?

Hung outdoors, your wreaths should last throughout the holiday season and into the new year. What may affect the greens is if your door faces south with long periods of direct sunlight, or hanging a wreath between a door and storm door creating a greenhouse effect. Some people like to hang our product indoors for part of the season to enjoy the balsam fir fragrance, then hang outdoors for longer enjoyment. When using indoors, misting with water may prolong the freshness. When the greens begin to look tired, mist and return to the outdoors. In cool moist climates, the product may reclaim some of its freshness.

How long will my centrepiece last ?

Indoors, your product should last for two to three weeks depending on the humidity level of your home.

Is there a way I can make my centrepiece last longer ?

In a dry air environment misting greens with water prolongs freshness. If you are going away for a few days, the candles may be removed and the base placed in the refrigerator to extend the life of your centrepiece.

Can I store my wreath or centrepiece before using it ?

If you do not plan on using their wreath or centrepiece right away, leave it packaged as you received it, place in a COLD, dark spot such as under the doorstep or in the garage. If the outdoor climate is warm, storing in the fridge or even the deep freeze works best.

NOTE: If you store it in your deepfreeze, allow it to thaw before handling. These items become a touch brittle at cold temperatures below 20 F
